High Card Flush

THE BASICS

High Card Flush is a card game played with a standard 52 card deck. There are multiple bets to be made by the Player. Ranking of hands are based upon the number of cards of the same suit (a Flush) in the Player's or Dealer's hand. The Ante and Raise bets correspond to the Player's hand versus the Dealer's hand. The Flush and Straight Flush bets are based upon comparing the Player's hand to the payable. These wagers remain in action even if the Player folds during play and forfeits their Ante and Raise bets.

Each Player plays against the Dealer. The game starts with each Player placing an Ante, Flush and/or Straight Flush bet and receiving seven cards. The Ante Bet must always be placed but the Flush and Straight Flush bets are optional. If the Flush and Straight Flush bets are placed they must be made before the Player receives any cards. The object is to have more cards of the same suit (a Flush) than the Dealer, regardless of suit or the highest order Flush.

TYPES OF BETS

Ante Bet wins when your Flush is higher than the Dealer's Flush, or if the Dealer does not qualify.

Raise Bet allows you to bet up to three (3) times your Ante bet, depending on your Flush. The better your hand, the more you can wager. The Dealer must qualify in order for you to win this bet.

Flush Bet compares to the Flush payable for great odds.

Straight Flush Bet compares to the Straight Flush payable and allows a guest to win big! The larger the Straight Flush the larger the win!

The Ante and Raise bets compare against the Dealer's hand, while the Flush and Straight Flush bets compare to those independent paytables.
